establishing the telephone call based on the ~~second~~ nature of address indicator in the formed session initiation protocol message; receiving a session initiation protocol message that includes a nature of address indicator;

mapping the received session initiation protocol message to a call establishment request of a different format, where the call establishment request includes nature of address indicator and where the different format includes one of a signaling system 7 format, an integrated services digital network format, an integrated services digital network user part format, or a channel associated signaling format; and
establishing a second telephone call based on the nature of address indicator in the call establishment request.

26. (currently amended) The method of claim 25, where the telephone number information further includes a numbering plan indicator, and where the mapping the telephone number information to a session initiation protocol format forms the session initiation protocol message to include a ~~second~~ numbering plan indicator.

27. (currently amended) The method of claim 26 where the establishing is further based on the ~~second~~ numbering plan indicator in the session initiation protocol message.

30. 40. (currently amended) The system of claim [[39]] 51 further comprising:
means for translating a ~~first~~ nature of address indicator included in the received session initiation protocol ~~request~~ message to cause the ~~first~~ call establishment request ~~message~~ of the ~~second~~ different format to include a ~~second~~ nature of address indicator.

50. (new) A system comprising:
means for receiving telephone number information that includes a telephone number and a nature of address indicator;
means for mapping the telephone number information to a session initiation protocol format to form a session initiation protocol message that includes a nature of address indicator;
means for establishing a telephone call based on the nature of address indicator in the formed session initiation protocol message;
means for receiving a session initiation protocol message that includes a nature of address indicator;

means for mapping the received session initiation protocol message to a call establishment request of a different format, where the call establishment request includes a nature of address indicator and where the different format includes one of a signaling system 7 format, an integrated services digital network format, an integrated services digital network user part format, or a channel associated signaling format; and means for establishing a second telephone call based on the nature of address indicator in the call establishment request.

51. (new) A system comprising: means for receiving telephone number information that includes a telephone number and a numbering plan indicator;

means for mapping the received session initiation protocol message to a call establishment request of a different format, where the call establishment request includes a numbering plan indicator and where the different format includes one of a signaling system 7 format, an integrated services digital network format, an integrated services digital network user part format, or a channel associated signaling format; and
means for establishing a second telephone call based on the numbering plan indicator in the call establishment request.

The following is an examiner's statement of reasons for allowance:

Claims 25 and 50 are allowed.

The prior art discloses call establishment between different devices of interest nationally and internationally and mapping the numbering plan to a subscriber accordingly.

The prior art however fails to disclose establishing the telephone call based on the nature of address indicator in the formed session initiation protocol message; receiving a session initiation protocol message that includes a nature of address indicator; mapping the received session initiation protocol message to a call establishment request of a different format, where the call establishment request includes nature of address indicator and where the different format includes one of a signaling system 7 format, an integrated services digital network format, an integrated services digital network user part format, or a channel associated signaling format; and establishing a second telephone call based on the nature of address indicator in the call establishment request.

Claims 30 and 51 are allowed.

The prior art discloses call establishment between different devices of interest nationally and internationally and mapping the numbering plan to a subscriber accordingly.

The prior art fails to disclose establishing the telephone call based on the numbering plan indicator in the formed session initiation protocol message; receiving a session initiation protocol message that includes a numbering plan indicator; mapping the received session initiation protocol message to a call establishment request of a different format, where the call establishment request includes a numbering plan indicator and where the different format includes one of a signaling system 7 format, an integrated services digital network format, an integrated services digital network user part format, or a channel associated signaling format; and establishing a second telephone call based on the numbering plan indicator in the call establishment request.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
